## TO THE TRADE

With gratitude to our many customers and friends for their patronage the past years we enter 1939 with renewed confidence in the future of our plant business. OMEGA BRAND PLANTS must not only be good plants—They must be the very best. Plants that will produce early heavy yields and make our customers money.

We do not have a list of all varieties but devote all our energies to a small list of leaders and specialize in top notch producers of profitable crops.

Your profit from vegetables this year will depend upon you getting the best quality plants. In our twenty-two years' experience growing and shipping plants we have learned where to get the best seed and how to grow and pack vegetable plants that will give satisfaction in every particular. All our plants are grown from the very best obtainable, upon land especially adapted to the growing of plants and in a climate of just enough sunshine and cold to grow for the best quality.

We have the land, a large force of experienced men and equipment for handling plants properly and we know our service is second to none, regardless of the size of your order.

**OUR GUARANTEE**—Knowing that seed or plants of the highest quality will often fail through improper treatment due to several reasons, we will not be responsible for the crop. However, we will refill or refund the purchase price on any order of plants not entirely satisfactory.

**HOW TO ORDER PLANTS**—All plants are sold on cash basis, so make remittance by postoffice or express money order, drafts or checks. This will save extra cost to you in making collections and returning money to us by postoffice and express companies. However, we will make shipments C. O. D. if you prefer them that way. Be sure and state date you want shipment made.

**WHAT TO DO WHEN PLANTS ARRIVE**—Unpack immediately and if weather is unfavorable for transplanting in the fields put on damp moss, or pack in cellar or trench them in ground until ready to set.

---

**THE QUICKEST WAY TO MAKE VEGETABLES IS TO SET  
OUR OPEN-FIELD GROWN PLANTS**

## Frost-Proof Cabbage Plants

OUR FROST-PROOF CABBAGE PLANTS are grown in the open fields and have been known to stand a temperature of 14 degrees above zero here without injury. They can be set much earlier than hot-bed, or cold-frame plants. The tops will not make much growth during the cold weather, but the roots will develop and have a good root system, and when the weather opens up they will make hard headed Cabbage much earlier than home-grown plants. It requires ten to fifteen thousand plants per acre.

We can supply the following varieties:

**EARLY JERSEY WAKEFIELD**—Best early and extensively used for home and market. Firm pointed heads with few outside leaves.

**CHARLESTON WAKEFIELD**—Larger and less pointed than Early Jersey, and about ten days later.

**GOLDEN ACRE**—Earliest round head variety, little smaller than Copenhagen Market and about a week to ten days earlier.

**COPENHAGEN MARKET**—Early round-headed variety, popular in all markets, very firm and of the highest quality.

**GLORY OF ENKHUIZEN**—Attractive, medium early, large, round and solid.

**ALL SEASON**—A desirable variety for early or late use. Very large flat heads.

**EARLY FLAT DUTCH**—Sure-heading, compact and early. Heads flattened and solid, larger than other varieties.

If you are in localities infested with cabbage yellows use the following varieties:

**JERSEY QUEEN**—An early pointed type yellows resistant strain used in place of Jersey Wakefield.

**GOLDEN ACRE (Yellow Resistant)**—Same as Golden Acre and about one week later than regular Georgia.

Early Jersey Wakefield

Golden Acre

---

WE SHIP CABBAGE AND COLLARD PLANTS 12 MONTHS  
IN THE YEAR.

## OMEGA PLANT FARMS, OMEGA, GEORGIA

---

**MARION MARKET (YELLOW RESISTENT COPENHAGEN TYPE).**  
About ten days later than Golden Acre.

**GLOBE (YELLOW RESISTENT GLORY OF ENKHUIZEN).**

**WISCONSIN HOLLANDER.** A late yellow resistant strain of Danish Ball Head. Splendid late for storage, shipping or kraut manufacturing.

**CABBAGE OR HEADING COLLARD.** Low growing compact. The loose clusters often tend to form a head.

## **COLLARD PLANTS**

**GEORGIA, OR SOUTHERN.** Tall growing, producing large, light green leaves, light frost will improve the crop.

Either of the above varieties of Cabbage or Collard plants at the following prices:

THE SAVING YOU EVER MADE ON PLANT BARGAINS**

FIELD OF TOMATO PLANTS

## **CERTIFIED TOMATO PLANTS**

(Tomato Plants are not Frost-Proof)

The Tomato Plant industry has grown with us until now it is our largest acreage. We are now prepared to give you certified Tomato plants. This certification shows that plants are true to name and are free of insects and injurious diseases, and have been grown under the supervision of a State Plant Pathologist. We will have five hundred acres for this season and can take care of your orders, whether for one hundred plants or a car load. Tomato plants are seven to ten inches high, about the size of a cedar pencil, with good root system. Plants are packed with roots wrapped in damp spagnum or peat moss, in well ventilated crates or boxes, and can be set in the fields immediately when they reach you. Send your orders in for Tomato Plants at the same time you do Cabbage, or when ready, and be sure to state date you want shipment made. Set from four to six thousand plants per acre.

**EARLIANA**—A red, early Tomato; very popular for home use.

**JOHN BAER**—About ten days later than Earliana; bright red and very attractive.

**BONNY BEST**—Favorite bright scarlet early variety, very vigorous growth and heavy yielder.

---

**TOMATO PLANTS ARE NOT FROST-PROOF**

## OMEGA PLANT FARMS, OMEGA, GEORGIA

**PRITCHARD (SCARLET TOPPER)**—An early heavy cropper, fruits globular shaped, and intense rich scarlet color. Fine all purpose tomato.

**STOKESDALE**—A new early variety with intense scarlet color, solid interior and marglobe shape.

**RUTGERS**—The new variety developed by New Jersey Agriculture Extension Station. Produces a vigorous plant, fruit resembles marglobe but ripens a few days earlier and a brighter scarlet color.

**MARGLOBE**—This variety is recommended for its resistance to wilt and nail head rust. Fruits are medium size, smooth, red and globular shape. It is a good second early and continues to bear until frost.

**MASTER MARGLOBE**—The finest strain of Marglobe bred to produce perfectly shaped fruits.

**GREATER BALTIMORE**—This variety is excellent for canning. Produces a large, solid, smooth fruit of bright red color and excellent quality.

**INDIANA BALTIMORE**—A select strain of Greater Baltimore preferred through the middle west.

Tomato plants for shipment during March, April May and June at the following prices:

### By Mail—Postpaid

We produced on our own farms and shipped by mail, truck and express last season eighty car loads of tomato plants. We are increasing our acreage about twenty percent for 1939.

**DON'T TAKE CHANCES—BUY OMEGA BRAND—  
BETTER PLANTS**

## BERMUDA ONION PLANTS

The Onion Plant business has grown in this section for the past few years until today Georgia is as heavy a shipper as Texas. Our onion plants are better because we grow onion plants for shipment only and do not set our choice plants on our farm and offer the weaker plants for sale. Onions grown from plants will keep much better than grown from sets, and you will always be glad you included onion plants with your order. Set from thirty to sixty thousand plants per acre. We can supply the following varieties.

### CRYSTAL WHITE WAX—

This is a very popular variety, an absolutely pure white Onion of waxy appearance. The sweetest and mildest of all the Bermuda Onions. There is a good demand for this on account of its handsome appearance.

**WHITE OR YELLOW—**This is a straw colored variety, exceedingly mild in flavor and very early. A very profitable variety for market, gardeners and truckers.

**PRIZETAKER—**This variety is famous all over the country for producing large onions. They are straw color, extremely mild flavor and good keepers.

**RIVERSIDE SWEET SPANISH—**Sparkling white flesh. Mild, sweet, good quality and splendid keeper.

You will notice only vegetable plants listed in this catalog. We devote our time to the growing and shipping of plants and find we can serve you better by doing this one thing well.

## BEETS

### FIELD GROWN BEET PLANTS

**CROSBY EGYPTIAN**—A standard early variety. Produces uniform globe shaped of deep red color, sweet, tender, and very good quality.

**DETROIT DARK RED**—The best selection for home gardeners. The roots are uniform in size and globe shaped, deep rich red color, deliciously tender and sweet.

OF PLANTS PER DAY!**

## OMEGA BRAND FIELD GROWN PEPPER PLANTS

All Pepper Plants are open field grown, but are not frost-proof. Plants may be set in open earlier than hot-house plants, as they are hardened by March winds and have been known to withstand light frost.

### SWEET VARIETIES

**WORLD BEATER**—One of the best of the larger peppers, fruits 5 inches long, 3 inches in diameter. Flesh mild and thick, deep red when ripe. Good shipper and very productive.

**RUBY KING**—Excellent for home, market, garden, and shipping. About as large as World Beater, vigorous grower, very profitable. Deep green becoming bright red, mild, sweet, thick flesh.

**PIMENTO**—A small mild pepper, glossy green when young, ruby red when ripe excellent for stuffing and canning.

**CALIFORNIA WONDER**—This is a large thick meated sweet pepper which we recommend above all others. Vigorous growing plants bear heavy yield of large blocky fruit 5 inches long and 4 inches wide.

### HOT VARIETIES

**LONG RED CEYENE**—This medium early pepper is long slender pointed, deep green when young and bright red when ripe, strong flesh and pungent.

**HUNGARIAN YELLOW WAX**—This early variety is larger than other hot peppers producing fruits 6 to 7 inches long and 2 inches in diameter. Excellent for canning. The color is waxy light yellow at first changing to orange and then to bright red.
